Claim Objections

1. Claim 7-18 objected to because of the following informalities:

For claim 7, "traffic control apparatus" in line 11, seems to refer to the same phrase in line 8. If this is true it is suggested to change this limitation to --said traffic control apparatus--.

Dependent claims are objected because of the above grounds

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For claim 1, "the sending destination" in line 57 is unclear. In the earlier limitations of claim 1, there is no "sending destination" in the first and second tables.

For claim 3, the limitations in line 2-7 are unclear and incomprehensible. Specifically, it is unclear how "to a transmission source address of each lower layer address of each lower layer address pair contained in the first information" relates to the rest of the claim language and what it means. It is not clear what the applicant is trying to claim.

Dependent claims are rejected based on their dependency on rejected claims.
